

Steel Appeal

SteelGuitarForum.com

The CS-10 gives you more performance, better sound and greater versatility than you'd expect from any single-neck, ten string guitar. The double-raise and double-lower changer system gives each string a five note potential. The changer system is universal so you can adjust the pedals and knee levers to your own personal sound and style. And with five pedals and four knee levers you'll slide into more music than ever.

The CS-10's precision, hand crafted construction lets you play in perfect tune . . . for a perfect performance. Whatever music's on your mind, the CS-10 gives you all the creative freedom you need to play it.

- Single-neck, 10 string pedal steel guitar.
- Five pedals, four knee levers.
- Pre-machined for ten pedals and five knee levers. (Use MSA Add-On Kit.)
- Universal double raise-double lower changer system to give each string a five note potential.
- Large, precision-quality tuning keys.
- All pedal and knee lever tuning is done on the right end plate.
- Aluminum reinforced frame around complete underside.
- Cabinets made of hardwood, covered in highest grade Formica and hand buffed to a deep lustre. Standard colors are White Tidewood, Mirror Black and Brazilian Rosewood.
- 35" long, 7 1/2" wide, 3 1/4" high.
- 36 lbs. (54 lbs. with case).

The high quality and economical price of MSA's SCS-10 is music to everyone's ears. The universal changer system lets you play your own pedal setting, your own tuning . . . for your own distinctive style. Tune up to your favorite sounds from country to rock.

The SCS-10's pedals and knee levers are extra quiet and give you a comfortable feel for every note you slide into. And the strings stay in tune even in the tumbling travels of roadwork. It's just a little price to pay to start playing so much music so well. . . MSA's Semi Classic Model SCS-10.

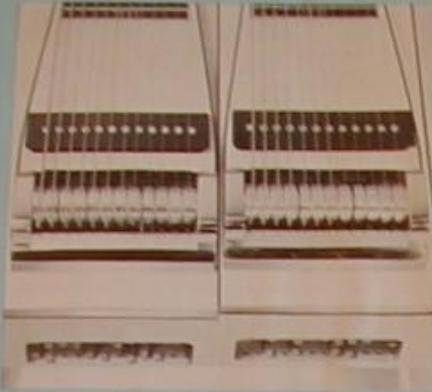

- Single-neck, 10 string pedal steel
- Three pedals, one knee lever. Pre-machined for four pedals and two knee levers.
- Universal single raise and single lower changer system.
- All pedal and knee lever tuning is done on the right end plate.
- Aluminum reinforced frame around complete underside.
- Cabinets made of hardwood, covered in highest grade Formica and hand buffed to a deep lustre. Standard colors are White Tidewood, Mirror Black and Brazilian Rosewood.
- 34" long, 7 1/2" wide, 3" high.
- 30 lbs. (48 lbs. with case).

The same expert craftsmanship that makes the MSA Classic models the finest professional pedal steel guitars, makes the Sidekick the finest moderately priced instrument. In fact, it's a great "second" instrument for professionals who want to travel light to small jobs and recording sessions.

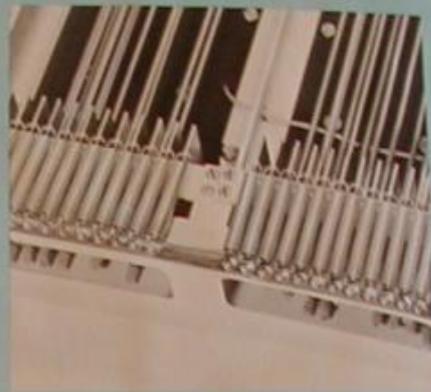

The famous MSA MicroWound pickup gives the Sidekick a loud, sustaining sound that rivals expensive instruments. The smooth, quiet action gives you a professional feel for each note. And three separate pedals plus one knee lever put you in full control of today's most popular playing styles. Pay less and still play your best with the MSA Sidekick.

- Single-neck, 10 string pedal steel guitar.
- E9 chromatic tuning.
- Three pedals and one knee lever.
- The cabinet and neck are made of hardwood and covered with a vacuum molded high impact ABS shell, trimmed along the bottom edge with a satin aluminum band. There are no rough edges or bad fits.
- The exterior shell is designed to take years of rough treatment and still maintain its new appearance.
- Standard colors are Black Leatherette, Red Leatherette and American Walnut.
- 34" long, 7 1/2" wide, 3" high.
- 25 lbs. (34 lbs. with case).

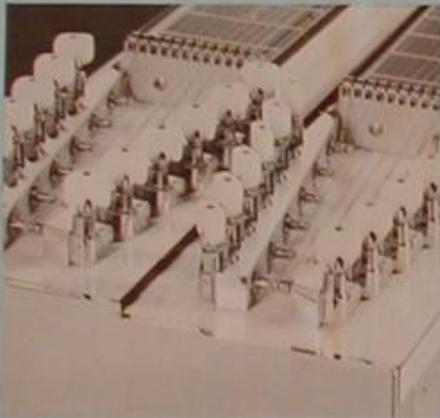

MSA SPECIAL FEATURES

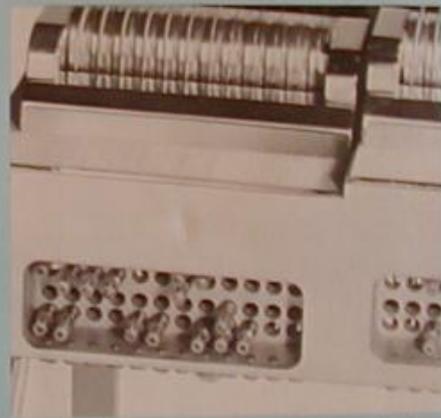

All new MicroWound pickup.

Universal changer system flawlessly activates strings.

Finest quality keys and fitted roller bridge made to exact specifications.

Double raise and double lower tuning mechanism.

Pedal contour is geometrically constructed for smooth, positive action.

Custom molded, high-impact case.

Custom cabinet is perfectly hand-fitted to end plates.

Precision moving parts in nylon bushings.

GENERAL MSA FEATURES

- MSA MicroWound Pickups for unsurpassed sustaining power, separation and tone quality.
- Collapsible knee levers for fast, easy set-up. Knee levers are satin anodized to prevent tarnish.
- No castings are used on the guitar. This allows precision fitting and eliminates pits and discoloring.
- Total engineering—even the underside is finished and uncluttered.
- Nylon bushings are installed between critical moving parts.
- Rod operated.
- Precision fitted roller bridge.
- Vacuum molded case is highly scuff and snag resistant. The guitar goes in upside down and is suspended in the case so that the tuning keys and bridge unit do not touch any surface.

CD-10

The CD-10's two ten-string necks let you switch tunings and styles instantly so you're practically playing two different instruments. You can play one sound with one, another with the other. And both necks are expertly engineered to have the same sensitive touch.

The CD-10 gives you full playing freedom. It's easy to change the pedal and knee lever settings to whatever music style fits your mood. They work either or both necks simultaneously for the greatest playing flexibility. You can even play five different notes with each string ... without using your left hand. Start playing as much music as well as you can ... with MSA's CD-10.

- Double-neck, 10 string pedal steel guitar.
- Eight pedals, two knee levers.
- Pre-machined for ten pedals and five knee levers. (Use MSA Add-On Kit.)
- Pedals and knee levers can pull either or both necks at the same time.
- Universal double raise-double lower changer system to give each string a five note potential.
- Large, precision-quality tuning keys.
- All pedal and knee lever tuning is done on the right end plate.
- Aluminum reinforced frame around complete underside.
- Cabinets are made of hardwood, covered in highest grade Formica and hand buffed to a deep lustre. Standard colors are White Tidewood, Mirror Black and Brazilian Rosewood.
- 35" long, 11 1/4" wide, 3 1/4" high.
- 49 lbs. (67 lbs. with case).

CS-12

With twelve strings at your fingertips plus five pedals and four knee levers, you can make all the music imaginable. The CS-12's pedals and knee levers move with a quiet, easy action that gives you the smoothest style. And MSA's MicroWound pickup delivers a rich, full sound that stays loud and clear through the longest sustaining notes.

You can rearrange the pedals to play whatever sound you want. Set them so you can play five notes on just one string. Give your favorite music a fresh, new delivery with MSA's model CS-12.

- Single-neck, 12 string pedal steel guitar.
- Five pedals, four knee levers.
- Pre-machined for ten pedals and five knee levers. (Use MSA Add-On Kit.)
- Universal double raise-double lower changer system to give each string a five note potential.
- Large, precision-quality tuning keys.
- All pedal and knee lever tuning is done on the right end plate.
- Aluminum reinforced frame around complete underside.
- Cabinets made of hardwood, covered in highest grade Formica and hand buffed to a deep lustre. Standard colors are White Tidewood, Mirror Black and Brazilian Rosewood.
- 35" long, 7 1/2" wide, 31" high.
- 37 lbs. (55 lbs. with case).

CD-12

With two twelve-string necks, eight pedals and four knee levers, the CD-12 will let you make more music than you ever thought you could handle. The universal changer system lets you set each pedal and knee lever to play any sound you want. They work either or both necks simultaneously for the biggest selection of sounds. And you can play five notes on just one string without even using your bar.

The CD-12's pedals and knee levers are extra quiet so you only hear the sound of your own music. And MSA's MicroWound pickups deliver a rich, distinctive sound that stands out and stays alive longer than ever. Play great and sound great. The CD-12 will keep bringing out the best in you.

- Double-neck, 12 string pedal steel guitar.

- Aluminum reinforced frame around complete underside.
- Cabinets are made of hardwood, covered in highest grade Formica and hand buffed to a deep lustre. Standard colors are White Tidewood, Mirror Black and Brazilian Rosewood.
- 35" long, 11 $\frac{1}{2}$ " wide, 3 $\frac{1}{4}$ " high.
- 52 lbs. (70 lbs. with case).

STEEL THE SHOW AWAY

Just a few years ago you could only hear the pedal steel guitar on a mournful country song or soothing Hawaiian soundtrack. Today it's speaking its own expressive language in nearly every style of music. Sustaining, swaying, rising, falling, happy and sad. The pedal steel guitar is making some of today's most sensitive sounds. And becoming one of today's most popular instruments.

It took years of design developments and careful construction to make the MSA pedal steel guitar what it is today. MSA has engineered the precision performance and musical versatility that lets every musician speak his own language. From sweet and mild country. To hard and wild rock.

Nearly every link in MSA's musical mechanical chain of parts is handcrafted, employing the use of precision tools and machinery for absolute perfection. All parts are machined within a .005" tolerance to insure smooth and quiet knee lever and pedal action.

And MSA's MicroWound pickups project a superior sound that's now becoming the standard in music. The sound of each string stays loud and full of life for the longest time...through the longest sustaining notes.

Only MSA puts so much personal time and care into its pedal steel guitars. That's why so many critical professionals only play MSA. They want to play the best.
